

Initiative

Initiative, or the lack of it, the development or the denial of it, appear to be quite common subjects of discussion in these days of the Great Depression. On the one hand, people are heard to say that adoption of the programme of the Socialists would result in the destruction of individual initiative, while, on the other hand, exponents of Socialism ask what initiative is left to people these days, and what initiative has an unemployed man sub-siding on Government relief?

Both are wrong. Socialism could not destroy individual initiative even if it would, because initiative is an attribute of the human individual, and it can be, has been, and always will be developed under any conceivable kind of government, or system, or set of circumstances. Initiative is God-given and cannot be destroyed; although its expression in definite action may be hindered, even for a time prevented.

Nor is it correct to say that present day conditions are destructive of initiative, and that there is no room for its exercise by many people at this time. Rather, the reverse is true. Necessity is said to be the mother of invention, and invention is only possible where initiative is first displayed. The necessities of the present are, therefore, an urge to greater rather than less initiative.

Not only so, but evidence is not lacking, rather it is available on every hand, demonstrating the fact that greater initiative is being manifested by thousands of hard pressed individuals than they ever thought of exercising in the days of prosperity.

After all, what is initiative? A simple dictionary definition says it is an introductory act or step; the first active procedure in any enterprise; power of taking the lead or of originating. That is, a baby shows initiative when it begins to creep, and more initiative when it takes its first toddling steps, and from that time onward through life. It cannot be destroyed.

But it can be encouraged, or discouraged; its development can be assisted or retarded. Parents and teachers have a very great responsibility in this respect. Employers, too, have an obligation in much the same way towards their employees, and if they are far-seeing they will realize that it is to their own advantage, as well as promoting the advancement of the employee, to encourage and assist their workers to display initiative in the tasks allotted to them. While it may be true, as sometimes charged, that Capitalism operates in some ways to lessen initiative, it is also true that in quite as many other ways Capitalism has promoted initiative.

Governments, too, under whatever system may be in vogue in a country, may develop the initiative, not only of individual citizens, but of a whole people and country. Too much paternalism in a home is a deadly influence upon the development of the initiative of a child, weakening its self-reliance, and sapping its courage. In like manner, too much paternalism in government operates as a deadly influence upon the citizenship of a country, weakening the self-reliance of the people, and sapping their courage to meet the inevitable obstacles and difficulties which sooner or later in life must be met and, if success is to be achieved, overcome.

Parents should not be expected to do everything for their children; teachers should not do things for their pupils but train them to do everything they can for themselves, only so is character and ability developed; employers should not look upon their workers as mere cogs in a machine, but as thinking, intelligent human beings with personalities and abilities and thinking powers of their own to develop and use for the common good of all; Governments are the creation of people in the mass to do what they want; as individuals, cannot alone do for themselves, but Governments were never intended to perform those services which the individual can and ought to do for himself and herself.

Referring back to our dictionary definition of initiative,—that it is the power of taking the lead or of originating,—the truth must be impressed upon us that, in the final analysis, it is the individual that must originate. In any great enterprise, or undertaking, in any large corporation, it is some one individual who first originated the idea to the development of which the organized forces of all are finally directed. Governments are only groups of individuals, and their policies have their birth in the minds of individuals, and their acts of administration are but the carrying into effect of a policy resulting from the initiative of some individual in the first instance, the wisdom and value of which is ultimately recognized by all.

A man or woman lacking in initiative never gets very far. If they are content to let others do their reading, study and thinking for them, then they will never become educated. If they are willing to lean upon others, and rely upon the judgment of others for decisions that may have to be made, then they will always be dependents, and never independent. If, they refuse to exert themselves, to express themselves, they will go through life bereft of the influence they might and ought to have exercised upon their times and fellowmen.

Initiative is a power, let it be repeated, that all possess. But like all power, it must be used, exercised, brought into play. Only so is it of any value, and only so can it be developed, and made to be the rich thing in the life of the individual it ought to be, and only so can the rewards it is designed to bring to its possessor be won. It is a great gift, an imperishable gift, which should be highly prized, never surrendered, nor allowed to fall into disuse.

Signs Are The Same

"Most women," says a writer, "can tell by looking at their husbands whether they get home from work whether it will be a picture show or a quiet evening at home." At the same time most men can tell it by just looking at their wives.

The economy and thoroughness of the raising of dairy-bred calves depends to a large extent on the methods of feeding.

Lord Ashfield, London's new traffic chief, begins the day with 40 minutes of exercise.

Weakening Diarrhoea
Dangerous Dysentery

Diarrhoea and Dysentery do not need to run for any length of time until the whole system is weakened and debilitated. Few other diseases so quickly undermine the strength and bring about a condition of prostration and often collapse.

Dr. Fowler's Extract of Wild Strawberry is not only prompt and effective in checking the looseness of the bowels, but at the same time it strengthens, stimulates and braces up the system.

Never be without a bottle of Dr. Fowler's. Always be prepared in case of emergency.

Science Comes To Aid

Can Help Narcotic Addicts To Overcome The Habit

Science has found a solution to the problem of the narcotic addict who attempts to free himself of the habit, anesthetists of the United States and Canada were told at their annual conference recently in Chicago.

Three New York anesthetists related their success in blocking nerves by means of alcohol injections effective for days and even weeks, thus relieving the patient of the torture of fever, nausea, neuralgia and other symptoms inevitably associated with stopping the use of a narcotic.

Most of the cases were those of persons who had contracted the habit as the result of intense pain during sickness or injury. Dr. M. B. Greene of New York explained, adding that it was different when the subject used narcotics from desire and was not interested in breaking the habit.

ARM IN SLING WITH NEURITIS

A token of gratification this woman says she is giving when she writes of her relief from neuritis:

"For twelve months I have had neuritis in my arm, and for the last two weeks I have had to wear a sling. Since then I have abandoned my sling, am able to sleep undisturbed, and can perform household duties that previously were not possible due to pain. I have derived from Krusen Salts. This has all happened in two weeks, and I am optimistic enough to think that in another fortnight I shall have said goodbye to a needless once and for all. Call it a testimonial if you choose; to me it is a token of gratification." (Mrs.) N.E.L.

Neuritis is a result of injuries in the body. And it can be relieved by controlling all over the system and setting up inflammation in the tissues, that causes those excruciating pains. Krusen Salts have been used to relieve neuritis, and now that Nature needs to persuade your internal organs back into a healthy, normal condition.

Argentine Raising Peanuts

Has Gone Into New Industry On Large Scale

Coffee and beef not being so much in favor as years gone by Argentina is beginning to raise peanuts on a rather large scale. In the past crop year production amounted to 135,591,328,450 pounds in the 1931-32 season, an increase of 33.5 per cent. The area harvested amounted to 192,393 acres an increase of 66.6 per cent. The average yield per acre was 892.5 pounds.

Pains After Eating?
Try This!

Pains after eating are generally due to an excess of acid in the stomach that forms gas and causes belching, heart burning, sour stomach and indigestion. Bisulatated Magnesia salts taste good and give such quick and pleasing relief you will be surprised. Any druggist will tell you ordinary Bisulatated Magnesia is fine for sour acid stomach conditions. It should be in every home. It works.

Queer Animals In Oxford Zoo

Cat Has Fully-Developed Fur-Covered Wings

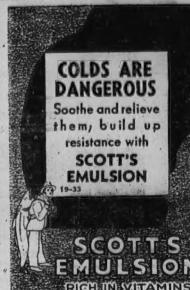

The curator of the Oxford Zoo has been puzzled by the arrival of a black and white cat which has on its back fully-developed fur-covered wings, with which it is stated it can fly. It was seen in a local garden to move from the ground to a beam, to which it could not have leaped, using its wings in a manner similar to a bird. The wings grow just in front of the hindquarters and measure a foot from tip to tip. The curator says he is somewhat sceptical whether the cat can really fly in the sense that a bird does. It is possible that its hindquarters are powerful and that it can spring to a considerable height, aided by its wings.

Romans Had One-Way Roads

One-way traffic was used by the Romans in Pompeii. The traffic problem was bad then because Caesar's chariots jammed the Appian Way. In 1868 a semaphore arm signal was erected at the junction of Bridge Street and New Palace Yard, London, and was illuminated by gas at night. All this was disclosed by H. E. Aldington at a meeting of the Institute of Transport in London to prove that present traffic problems are not new.

Police of Gravesend, England, are to carry small cameras so they may take pictures of accidents.

Industrial activity in South Africa is increasing.

Building Speedy Train

U.S. Railroad Figures It Will Travel Two Miles A Minute

Rapid progress is being made in the construction of the Burlington's two-mile-a-minute motorized stainless steel train in the Philadelphia works of the Budd Manufacturing Co. Experts from the United States Steel Corp., General Motors, Winton Engine Works and the Burlington staff are scrutinizing every step of the development.

Travel experts call the Burlington's new train "a sensational answer to the inroads on passenger travel by busses and private cars and a challenge likewise to air transportation."

The equipment is the last word in automotive and airplane development for railway passenger travel. The train will be a three-section articulated unit, operating on four four-wheel trucks instead of the normal size three-car train.

The train is designed along aerodynamic lines, and from the standpoint of accommodation will weigh less than half a steam train of like capacity. It will be powered by a Diesel electric engine.

Sees Marked Improvement

United States Banks Finds Conditions In Britain Better

Quite talkative about the marked improvement in British business conditions was J. P. Morgan, United States banker, on his return to New York from an extended visit to Great Britain.

While silent on various questions put to him concerning the domestic situation here, the N.R.A., new banking laws and inflation, Mr. Morgan did emphasize that England had turned the corner away from hard times.

England is getting on very well. Improvement certainly is well set in there. The heavy industries are showing improvement and the whole feeling there is that things are better and improving."

There is no substitute for potash in agriculture. It cannot be replaced in the plant's economy by soda or any other compound.

The Russians are now breeding emus for food. It would be interesting to know what the emu was used for before crosswords were invented.

New Submarine Chaser

Royal Air Force Machine Will Be Stationed At Malta

The first Royal Air Force flying boat carrying a quick-firing gun, capable of firing shells, in addition to ordinary machine guns, has been completed by the Blackburn Airplane Company at Brough. The craft is designed principally for submarine chasing.

The new gun, which is mounted on a rotary turret in the forward cockpit, can fire 100 rounds per minute one and one-half pound shells over an effective range of 1,500 yards. The shells are held in clips of five. The connection from firing all five rounds in quick time is said to temporarily reduce the forward speed of the flying boat by ten miles per hour. The experiment of mounting the gun whose recoil—representing a pull of 1,600 pounds which has to be absorbed in the boat's structure—will be watched with keen interest by a force of several nations which are concerned with the same problem.

The machine will be able to fly 132 miles per hour with a maximum range of 1,500 miles. The wing spread is 97 feet and the length is 70 feet. It stands nearly 26 feet high. The new ship, named "Blackburn Perch," is one of four to be built at Malta.

Does Not Produce Chancellors

Only Two In Last Hundred Years Born In Scotland

Where do the Chancellors come from? Scotland claims so many of the Premiers and Archbishops of Canterbury of recent years that it would not be surprising to find the Northern Kingdom providing a good proportion of Chancellors of the Exchequer as well, especially in view of the Scottish genius for looking after the bawbees. In reality, however, only two Chancellors in the last 100 years were born in Scotland—Sir Robert Horne and the first Lord Ritchie, Mr. Neville Chamberlain was born in Birmingham—and so was his brother, Sir Austen, who was Chancellor thirty years ago. London can claim Disraeli and a number of others. Among the counties, Yorkshire can boast of three great names—Lord Snowden, the late Lord Oxford and Asquith, and Sir William Harcourt. But Lancashire can show three who are possibly still more famous—Mr. Lloyd George, who was born in Manchester, Gladstone, and Sir Robert Peel.

When Your Daughter Comes to Womanhood

Give Her Lydia E. Pinkham's Vegetable Compound

Most girls in their teens need a tonic and regulator. Give your daughter Lydia E. Pinkham's Vegetable Compound for the next few months. Teach her to guard her health at this critical time. When she is a happy, healthy wife and mother she will thank you.

Japanese Ambassador
Recalled From Washington

Not Expected To Return And No Reason Given

Ambassador Debuchi, for five years Japan's envoy to the United States, has been summoned to Japan and does not expect to return to Washington. No disclosure has been made of who will succeed him nor was any official explanation made of the reasons behind the summons.

Speculation arose immediately over whether the decision of President Roosevelt to negotiate with Soviet Russia for a restoration of diplomatic relations had influenced the sudden action of the Tokyo government.

For nearly two years there have been frequent reports from Japan that Debuchi was too conciliatory in his attitude toward the United States to suit the army group within the Japanese government.

Natives Are Shocked

Members of the American colony in Majorca who shock the natives by wearing insufficient clothing will hereafter be treated as vagabonds under the new Spanish law and expelled from the country. Native Majorcans have been frequently shocked by foreigners going through the streets in their bathing suits and barefooted. To go barefoot makes an offense particularly heinous in the eyes of Majorcans.

OCCASIONAL WIFEBy EDNA ROBB WEBSTER
Author of "Forests," "Lipstick Girl," Etc.**SYNOPSIS**

Camilla Hoyt, young and beautiful commercial artist, and Peter Anson, a struggling sculptor, meet in an art class and fall in love. She is the adopted daughter of a wealthy family, but is not to share in their fortune. They are faced with the problem of "marriage or career" and Camilla does not want to let Peter down when he has so much promise as a sculptor. At an art school dance, Camilla's friend, Peters roommate, who is jealous of Peters success, takes Camilla out on the lawn to tell her "something she should know about Peter." Gus tells Camilla that Peter is a scoundrel who wants her money and that he, Gus, loves her himself. At that moment Peter appears on the scene and knocks Gus flat. On the way home from the dance, Camilla tells Peter that they are going to do something about their problems: She decides that they are to be married, and until Peter establishes himself, go on living their separate lives. Above Peter's protests she carries her point.

(Now Go On To Story)

CHAPTER XV.

When Peter returned to his room, he found that Gus had been there and gone again, taking with him all that belonged to him and several articles

SOUR STOMACH, GAS

"I could not enjoy a meal, because of the bad after-effects—sour stomach, gas, etc. I lost weight, became nervous, etc." says Wm. Franklin, of 491 Kenwood Avenue, who says, "I took Dr. Pierce's Gold-Medal Discovery and my digestion was better and I enjoyed my meals, and I feel so much better."

Write Dr. Pierce's Clinic, Buffalo, N. Y.

belonging to Peter, as well. In the days which followed, he missed various of his possessions as he needed them: his tie, a lately acquired shirt, his work jacket and materials. In lieu of these, Gus had left his own discarded belongings.

But Peter dismissed such trivial matters from his thoughts and devoted them to ways and means of justifying his marriage to Camilla as soon as school closed in June. All their plans were made. They would be married quietly and keep it secret, if possible. Peter had wanted to take a studio somewhere near the museum, where he could work alone and devote all his time to studying and modeling. They agreed that he should do just that. Camilla had planned to remain with the Hoyts during the summer, while she looked for a position. Beyond that, everything was undecided. Her own family had suggested that she might return to them, but she had no desire now to share a home and family which had discarded her once. True, it has been done in the interest of her welfare, but she resented it, nevertheless.

A more attractive plan for her, she thought, would be to share a room somewhere near town with her younger sister, Rose, who already was a file clerk in a downtown office.

"I've always liked Rose best," said I've known my family," she told Peter. "Of course, we aren't much alike, having lived in such different environments, but we agree pretty well and she's a wise little kid. I think I could learn a lot from her, and teach her things, too. It might be good for both of us, you see."

Peter favored that plan to her living at home, so it was tentatively arranged that as soon as Camilla obtained a position, she and Rose would take a room somewhere together. But upon no account was Peter to consider himself obligated to her as a husband. Everything was to be sacrificed to his career except their occasional pleasure of seeing each other and sharing inexpensive recreations such as they would have done under other circumstances. There was some discussion about confining their plans to the place that has been home.

"Camilla," she ventured one evening, "it can't be that I am interested in this—ah—Mr. Anson?"

"Why shouldn't I be interested in him? He is the most popular fellow in school!" she replied calmly enough, while her heart beat furiously at the mention of Peter's name. Of course, he was in her thoughts constantly, but it startled her to hear his name spoken by anyone else. Mr. Anson—soon now she would be Mrs. Anson, she thought with exultation.

"Of course, but being popular at National is of little significance. Such prominence can mean nothing. You must not waste your attention upon a man who is not already established."

Anger swelled within Camilla's breast, but she had learned to control her thoughts and speech in the presence of this dominating woman whom no words could move. Opposing her was like insisting that you were stronger than a stone wall and trying to batter it down with your feeble force. Better to admit that it was there and later climb over the obstruction quietly.

"I don't intend to waste my attention upon any man," Camilla replied enigmatically. Which was true enough: Any attention which she gave to Peter was not wasted, she thought with a secret happiness, and continued thoughtfully, "My greatest concern now is a position. You know, mother, I'm beginning to thank you a lot for the arrangements you made for my future. You couldn't have done better, because I am going to do that."

"To you," she reminded him.

"Well, it had better be to me," he laughed happily. "How about the honeymoon?"

"We shall have that when you are famous and we can sail around the world," blithely.

"By that time, you will be a good old lady with white hair and I shall be a crochety old fossil," he warned her.

"I'll wait! But, Peter, you might get your new studio ready, to celebrate our wedding!"

For which he applied himself to every odd task he could find that would add a few dollars to his depleted account. He had hoped to take one of the larger studios in the Craft building, but he kept this cherished ambition to himself and managed a similar one in the Annex Hall, in the rear. At least, it was very much better than the shabby rooming house where he had been living, and where he would not have taken Camilla for anything in the world.

There were times when he doubted the wisdom of their impulsive plans. This wasn't the way he wanted Camilla. Still—he could have her no other way—unless he took some commercial position at a nominal salary and sacrificed his beloved dream. He would do that, even, if some situation developed which made it necessary. But for her sake as well as his own, just now, the braver, wiser course was the one on which they had agreed.

Even so, she was a magnificent little sport to take such chance with him. Like a youngster who refuses to look at the mine pie while he obediently eats the bread pudding which his mother recommends for him. Well, he never would forget her loyalty, he vowed, and resolved to make it up to her some day. He hoped that day would not be too far away.

As like a shining garment, her joy of anticipation could not have been greater had she approached a marriage of prominence and wealth, to be celebrated with a royal wedding. Her manner continued to mystify Mrs. Hoyt, who rather envied anyone whose slightest word or action could convey so much delight. Her beauty glowed warmly, as a flower-bud opens

expectantly to the promise of its fulfillment.

She laughed and sang about the house as she had done in those years before she had learned the truth about her family and position. She was much more amiable and confidential with Mrs. Hoyt. At the same time that person knew she was concealing from her the most intimate experience in her life.

"Camilla, you are incorrigible. You always have been a problem that grows no better with age and looking for a solution."

"Then you'll be rather glad to be rid of me, won't you?" she observed thoughtfully—with that inherent twinge of pain which everyone experiences at the thought of leaving the place that has been home.

find myself and real happiness in this great adventure into which you have forced me."

"But my dear, my plans did not involve taking a position. I desired you so that you could marry wealth and position—and you may, at any time you wish. Terry called again to-day..."

"I'm not at all interested in Terry. I am too busy to be wasting my time on a man like him," she repeated, with a chuckle. "Our class assignments are pretty heavy now and final exams in two weeks. All the time I can spare for social affairs will be occupied at school. By the way, are you coming to see me presented with my certificate of entry into the world affairs? Society will be represented quite largely, because I am not the only lady of leisure who got stung with the ambition bug. Avis Worth, you know, and Muriel Ames are in the same class. The difference is that they went to National to increase their chances of finding a man and I went to decrease my need of accepting one," she laughed.

"Camilla, you are incorrigible. You always have been a problem that grows no better with age and looking for a solution."

"Then you'll be rather glad to be rid of me, won't you?" she observed thoughtfully—with that inherent twinge of pain which everyone experiences at the thought of leaving the place that has been home.

"Camilla, you are incorrigible. You always have been a problem that grows no better with age and looking for a solution."

"Then you'll be rather glad to be rid of me, won't you?" she observed thoughtfully—with that inherent twinge of pain which everyone experiences at the thought of leaving the place that has been home.

"Camilla, you are incorrigible. You always have been a problem that grows no better with age and looking for a solution."

"Then you'll be rather glad to be rid of me, won't you?" she observed thoughtfully—with that inherent twinge of pain which everyone experiences at the thought of leaving the place that has been home.

"Camilla, you are incorrigible. You always have been a problem that grows no better with age and looking for a solution."

ROYAL YEAST CAKE

Coffee Cake
A Real Treat!

COFFEE CAKE—equally popular for tea, luncheon or supper.

Cream together ½ c. butter and ½ c. sugar, add 1 well beaten egg and ½ c. milk. Add this to 2 c. flour and ½ tsp. soft to 1 c. Royal Yeast Sponge* to make a light, fluffy dough. Knead lightly and let rise in a greased bowl. Cover and set in warm

***ROYAL YEAST SPONGE:**

Soak 1 Royal Yeast Cake in ½ pint water for 12 hours. Dissolve 1 c. sugar in ½ pint milk. Add to dissolved yeast. Add 1 quart bread flour. Beat well by hand. Cover and let rise overnight to double in bulk in

B E SURE to keep a supply of Royal Yeast Cakes on hand to use when you bake at home. Sealed in air-tight waxed paper, they stay fresh for months. These famous dry yeast cakes have been the standard for over 50 years. And send for free copy of the ROYAL YEAST BAKE BOOK—gives 23 tested recipes. Address Standard Brands Limited, Fraser Ave. & Liberty St., Toronto, Ont.

Our free booklet, "The Royal Road to Better Health," tells how Royal Yeast Cakes will improve your health and make you feel pleasant ways to take them.

Removing Old Landmark

Chequers Inn Was Once Haunt Of Highwaymen In England

Chequers Inn, in Islsworth, England, former haunt of highwaymen and famous in fiction, as the place where Bill Sykes spent the night before the burglary is to be razed after 400 years of service. Its rambling red roofs and crooked dormer windows have seen stirring sights, and the upper story, built out low over the street, has caused the proud heads of Turpin and Duval to stoop as they entered for refreshment or plunder. So frequently were the raids of the highwaymen of the Heath that a wily landlord devised a method of saving his brandy and his hollands. The concealed pipes which supplied the bar with spirits from kegs hidden in the ceiling in the room above, and the dummy casks which were kept full of water, to hand over to the raiders, are still to be seen.

The Only Exception

"What a big family you have, Mrs. Jones," said the visitor.

"Yes"—And the funny thing is that all the names begin with a halitch. There's O'racle, O'erbert, Enry, Ugh, U'her, A'rold, Arriet and Etty—all except the last one, and we'd er named Hallice."

Turkey's semi-official Navy League has been succeeded by the Aviation League.

Almost Instant Relief From Neuralgia

1. I'll have to get a taxi and go home. I've developed a terrible attack of neuralgia. Mary, why don't you try 2 Aspirin tablets. They'll help rid of your neuralgia in a few minutes.

2. 20 MINUTES LATER — It's wonderful how quickly my neuralgia went. That Aspirin certainly works fast.

For Quick Relief Say ASPIRIN When You Buy

Now comes amazingly quick relief from headaches, rheumatism, neuralgia . . . the fastest safe relief, it is said, yet discovered.

Those results are due to a scientific process. The tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence start "taking hold" of pain.

The illustration of the glass here tells the story. An Aspirin Tablet starts to disintegrate almost instantly when you swallow it. And thus is ready to "take hold" of pain.

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN's quick relief, be sure the name BAYER in the form of a cross is on every tablet of Aspirin.

The schedule of a new express train in England calls for speeding 226 miles in 237 minutes.

America is the place where you can find an abandoned home but never an abandoned golf course.

Main Street

Dr. Richardson, of Viking, has taken over the dental practice at Irma of Dr. Murray and will from now on visit Irma every Friday where he will continue to work in the rear of the Drug Store.

Mr. Steve Hlynka spent last Saturday and Sunday in Edmonton.

Born—To Mr. and Mrs. Lewis Larson, a daughter, on Saturday, November 4th. Congratulations.

Don't forget the November meeting of the W.M.S. next Thursday at the home of Mrs. J. H. Elliott.

The teacher, Miss Murray and friends, of Avonlea school, are holding a whist drive on Friday, November 24th in aid of the Christmas tree fund. Everybody welcome.

Just another reminder of the anniversary supper in the church next Monday, November 13th.

Miss Marion Cornish, of Heath, is assisting at Mrs. Schommer's.

Mrs. M. A. Flewelling and Miss Alice Flewelling have moved to the home of their daughter and sister, Mrs. Tate for the winter months.

Mr. Louis Popp died in the Wainwright hospital Friday night, November 3rd. The body was brought back to Irma Saturday afternoon and buried in the Irma cemetery Monday morning. Rev. Father Doyle conducted the funeral service in the Roman Catholic church.

Mr. S. C. Miles held a successful auction sale on his farm on Tuesday November 7th. Mr. and Mrs. Miles, with their son and daughter, Charles and Mary, intend making their home in future at the Pacific coast.

McBain Is Nonchalant After Fourth Round

With a languid "ho-hum" in the fourth round of a scheduled ten round main bout at Irma last Friday evening, Lightning George McBain walked out of the ring victor over Kid Baker after landing a terrific left-hook to the jaw of the Cow-town's hope.

When the Kid came to, which was several minutes later, he anxiously enquired if the engineer was killed when the train left the track.

Both artists of the padded mitts felt out each other in the first round, and hours were even. In the second stanza both limbered up and considerable fast footwork and punching pleased the fans.

At the sound of the starting gong for the third, McBain pulled out from the side-track onto the main ring. The Kid doing likewise, but McBain's galloping rods were going faster as the round progressed. It was decidedly George's.

The snappiest boxing Irma's fans have seen in many moons took place in the fourth, with McBain giving the Kid no quarter, juggling him into a position favorable for the good old reliable left-hook. "One of the quietest knockouts I've seen in boxing," said one ardent Viking supporter.

The preliminaries were very good, and pleased the fair-sized crowd.

The show started off at nine o'clock with a two-round bout between Al Hockett and Albert Howard, both local boys. This bout was declared a draw.

The second encounter was between Jimmie Carter and Geo. Dawson. This was also a two-round go and more of a heavy hitting exhibition. Dawson was announced the winner.

The third preliminary was between Bob Maguire and Geo. Forman (Maguire substituting for Clarence Renwick who failed to appear). These two young lads provided lots of amusement for the fans for three fast rounds. This was Bobbie's first experience before an audience. The referee declared the bout a draw.

The fourth item on the program was a four-round bout between Kid Grayson, of Wainwright, and Bob Lukens, of Irma, who substituted for Terry, of Hardisty, who was found to be physically unfit by Dr. Greenberg. This was a good scrap all the way through, Lukens being declared the

winner.

Dr. Greenberg was timekeeper for the occasion, and proved highly satisfactory.

The affair was promoted by Archibald and Kennedy, while Kirk Snyder of Wainwright proved a popular referee. Many of the fans present signified their intention of being in the very front row when the gong hits for the big Armistice Day boxing card in Viking this Saturday evening, November 11th.

Viking Items

Mrs. O. Fitzmaurice is a visitor in Edmonton this week.

V. Pruner, the Vegreville tailor, was a visitor in town on Monday.

Items for this column are always appreciated. Phone 19, call, or write. Mrs. P. E. Finch is in Edmonton visiting with friends.

Mrs. Borden Reid has as her guest, her mother, Mrs. Johansen, of Tatnawas.

Caretaker Alexander informs us the skating rink may open on Friday or Saturday of this week.

Miss Rene Tebbutt and Mr. Donald Cameron are visitors at the home of Mr. and Mrs. W. J. Brown this week. Bill Smith, who has been engaged in farming operations about Strome, has returned to town.

Mrs. Hanson of Berkeley, California, arrived recently and is a guest at the home of her daughter Mrs. G. C. Haworth.

Albert, the infant son of Mrs. O. Berg, who accidentally scalded his legs last week, is progressing favorably.

Mrs. M. Featherstone left for the coast on Saturday, spending the past four months at the home of her son, Ed. Featherstone, north of town.

The next meeting of the Swastika club will be held at Poplar Hill school house on Monday, November 13th, at 8 o'clock in the evening.

Gilbert Soneson left on Monday as delegates to attend to the annual convention of the U.G.C. being held at Winnipeg this week.

Mrs. George McNeil, who has been visiting at the home of her sister, Mrs. George A. Loades, returned to her home in Edmonton last week.

The president, officers and members of the W.A. wish to thank all those who helped make their annual bazaar such a success.

The new skate sharpener is expected this week from the East at Bill Brown's garage. Call in and see this machine when it arrives.

J. L. Whyte, formerly of the Creemore staff, is opening a delicatessen shop in the Viking Bakery. Note his announcement in this issue.

The Anglican Altar Guild wish to sincerely thank all their many kind friends and helpers who gave and helped to make their church bazaar such a tremendous success.

Mrs. C. G. Purvis and Clair Johnston were called to Morden, Manitoba last Friday on account of the illness of Mrs. Johnston's mother. Mrs. Johnston is a sister of Mrs. Purvis.

Miss Fern Alexander, who is teaching school north of Fabyan, spent the week end here at the home of her parents, Mr. and Mrs. J. Alexander.

Farmers should remember that the Viking News' wheat subscription offer is still on and will last until the end of the year. We have taken in wheat from as far as Killam.

Frank Pratt, eldest son of Mr. and Mrs. John Pratt, underwent an operation for appendicitis at the local hospital on Monday and latest reports are that he is improving. Dr. Farrell of Holden, assisted Dr. Haworth.

Harry Lawes, Ken Hilliker, Charlie Broughton and Doctor Richardson know where the ducks go in the winter time, having got a fair sized bag the first part of the week. (Ask Harry)

Steve Rae, of North Battleford, has accepted the position of manager of the local V. Pruner tailor shop, and we understand comes highly recommended. The usual line of pressing, cleaning and repairing of men's

and women's clothing will be carried on, besides tailoring in all lines.

The executive of the Hockey Club wishes to thank the business men of Viking for their generous donations toward improving the rink's conveniences which will make it more comfortable for the hockey fans to watch our boys play.

The regular monthly meeting of the Anglican W.A. will be held in the vicarage on Tuesday afternoon, November 14th, at 3 o'clock. Hostesses, Mrs. Gillespie and Mrs. Anderson.

The Norwegian Lutheran Ladies Aid are preparing for their annual dinner which will be held in the basement of the church on Saturday November 18th. Plan to be there and enjoy a real good meal.

Miss Violet Loades is now resting comfortably at home after being confined to the local hospital for some considerable time. Miss Loades takes this means of thanking all those friends who helped to make her stay in the hospital so much brighter.

The musical program given by Carsten Woll in the north hall on Tuesday evening under auspices of the Sons of Norway was highly enjoyable. Mr. W. Will gave selections in the Scandinavian, as well as English language and proved himself a versatile artist, playing his own accompaniments. A dance and lunch concluded a fine evening's entertainment.

Mr. W. Lowden, special land expert representative of The Tip Top Tailors, will be at the store of the local representative, Mr. Sid Stowe, on Wednesday, November 15th. This is a splendid opportunity for the man in need of new apparel, as the latest styles, cloths, etc., will be available, coupled with the expert fitting by Mr. Lowden.

**Health Service**

OF THE
Canadian Medical Association

Edited by
GRANT FLEMING, M.D. & ASSOCIATE SECRETARY

"Get It Over With!"

It was hoped that the popular idea which prevailed not so many years ago to the effect that a child should "get it over with" in regard to certain of the acute communicable diseases while still in his cot or during the toddling years, had long since disappeared. While, this feeling through bitter experience, is no longer as strong as it was formerly, yet there is still an unfortunate tendency, on the part of some otherwise intelligent parents, to feel that such and such a disease is inevitable anyway, and that the sooner the child comes down with the disease in question, the better it will be for himself and for all concerned.

"He's bound to catch it sooner or later, so why worry?" is the substance of the excuse one still occasionally hears. The question of whether the infant will make the grade or not does not enter into consideration or, at least, find expression in words, until a younger child—usually the youngest of a family—succumbs and the lesson is learned. This attitude of mind, which is part and parcel of a fatalism now centuries old, is not only responsible for much needless suffering in a personal way, but is one of the outstanding factors in the spread of disease of an epidemic nature.

and women's clothing will be carried on, besides tailoring in all lines.

The executive of the Hockey Club wishes to thank the business men of Viking for their generous donations toward improving the rink's conveniences which will make it more comfortable for the hockey fans to watch our boys play.

While dwelling upon our misfortunes it might restore our confidence and renew our faith in Canada by counting a few of our blessings.

Among them might be enumerated the comparative freedom of this Dominion from such afflictions of nature as earthquakes, floods and tornadoes. Canada is notably free from these destructive visitations.

Mexico has experienced a series of floods and storms that brought death to nearly a hundred people and injuries to close to a thousand more, besides creating a situation from which plague might readily start.

China had floods which cost the lives of tens of thousands of people. The West Indies and the south-western coast of Florida have been ravaged by terrible storms, causing death and havoc to property. The Californian coast lives under the constant menace of earthquakes.

Canada has not the salubrious climate of the tropics, it is true, but this country has a freedom from death and property destruction due to floods and storms that may be considered remarkable. An occasional overflowing river and, in rare instances a cyclone, are about the worst that may be expected here.

The forces of nature when fully

concentrate are terrible or very easily spread; that by sneezing, coughing and by close contact one is likely to pass on an infection. This is especially the case with regard to the acute infections of childhood. It is equally true that, by judiciously avoiding all sources of contact with an individual, sick with an acute fever, it is possible to put off and perhaps to avoid altogether an illness which runs a tragically high mortality early in life. Take, for instance, two diseases of special significance in childhood, namely, measles and whooping cough. Under the age of two, over twenty and sometimes thirty out of every hundred children with either of these diseases, succumb to complications arising therefrom. After two years of age, there is a considerable drop in the death rate, and from the age of five onwards, practically all cases recover.

Just because measles and whooping cough are prevalent in a community is no reason why children of all ages should not be protected from them, and this precaution is especially indicated in the case of the very young child.

Questions concerning health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by

concentrated in a destructive orgy terrible in their might and power. Human beings are pitifully weak in comparison. We may indeed be thankful that our Dominion is blessed with exemption from their deadly effects.

Only Cost of Trench Silo That of Labor

At the Dominion Experimental Station, Morden, a trench silo 42 feet long, 5 feet deep, 14 feet wide at the top and 8 feet at the bottom was excavated by two men, two teams, a slip scraper and plough in two days. Old squared timbers were used to increase height two feet on top, while the soil was dumped on each side of timber to increase the height above ground level in preference to excavating the usual depth. Other than the old timbers no lumber was used in building the trench. The only cost was that of labour.

This silo held approximately 70 tons of green corn. Horses were used for packing the silage. It is highly important to have silage very firm in a trench silo. Sometimes the farm tractor is used at the end of the day to make sure the silage is well firm.

After trench silo has been filled, at least two feet of cut straw is blown over the top of the corn. Wet stack bottoms can be used in preference to dry cut straw. The straw should be well soaked with water and covered over with poles, straws, or anything that will keep the straw or chaff from blowing. After straw has been soaked a pail of oats should be scattered over the surface as the oats tend to sprout and become matted excluding the free passage of air over the top of the silage.

It is preferable to allow silage to ferment and become well settled before opening the silo for feeding. A stone boat with a box attached that can be hauled by one horse may be used for hauling silage from silo to barn.

There is generally sufficient heat in a trench silo to keep silage from freezing. At no time during the cold days of winter was the silage frozen to any extent at the Morden Station. The silage should be taken out as you would slice a loaf of bread, taking a width right across the end of the trench.

Owing to the greatly increased acreage of corn seeded this past spring, farmers are well advised to consider the possibilities of the trench silo.

While dwelling upon our misfortunes it might restore our confidence and renew our faith in Canada by counting a few of our blessings.

Among them might be enumerated the comparative freedom of this Dominion from such afflictions of nature as earthquakes, floods and tornadoes. Canada is notably free from these destructive visitations.

Mexico has experienced a series of floods and storms that brought death to nearly a hundred people. The West Indies and the south-western coast of Florida have been ravaged by terrible storms, causing death and havoc to property. The Californian coast lives under the constant menace of earthquakes.

Canada has not the salubrious climate of the tropics, it is true, but this country has a freedom from death and property destruction due to floods and storms that may be considered remarkable. An occasional overflowing river and, in rare instances a cyclone, are about the worst that may be expected here.

IN FLANDERS' FIELDS

In Flanders' Fields the poppies blow
Between the crosses row on row
That mark our place, and in the sky
The larks still bravely singing, fly
Scarce heard amid the guns below.
We lived, fell down, saw sunset glow,
Loved and were loved, and now we lie
In Flanders' Fields.

Take up our quarrel with the foe!
To you from failing hands we throw
The torch. Be yours to lift it high!
We shall not sleep, though poppies blow
In Flanders' Fields.

Take up our quarrel with the foe!
To you from failing hands we throw
The torch. Be yours to lift it high!
We shall not sleep, though poppies blow
In Flanders' Fields.

Take up our quarrel with the foe!
To you from failing hands we throw
The torch. Be yours to lift it high!
We shall not sleep, though poppies blow
In Flanders' Fields.
